

smart technology to make life simple

Door/Windows Sensor 2nd Edition

Wireless | Smart | Security

The FOXX Project® Door / Window Sensor is a battery- powered Z-Wave magnetic contact door/ window sensor. The Door / Window Sensor will send radio signals up to 6 associated Z-Wave devices within its own Z-Wave network when the main unit separates from the smaller unit (i.e. the door or window it is attached to is opened).

Bidirectional mounting plates and a push button release clasp allows for easy end-user installation. The FOXX Projects® Door / Window Sensor also has tamper prevention capabilities and low-battery alerts.

The FOXX Project® Door / Window Sensor also includes the latest stable Z-Wave technology including Z-Wave Explorer Frames.

THE CONSUMERS PROBLEM

THE IMPACT ON THE CONSUMER

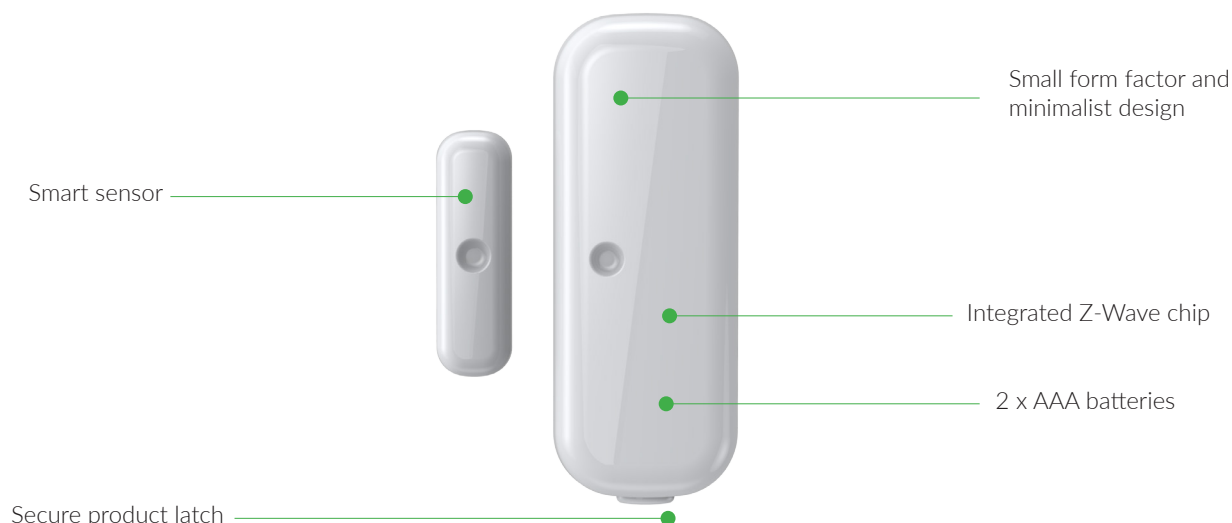

THE SOLUTION FOR THE CONSUMER

- You often travel and want to be alerted when your doors or windows is opened.
- You forget to regularly close all of your windows.
- Stress & discomfort
- Time & inconvenience
- Potential of burglary
- Easy DIY installation on your doors and windows.
- Instant notifications when either a door or window has opened.
- Set-up a reaction to the sensors detecting an opening, such as a siren.
