WACOM® One
Creative Pen Display

A world of new possibilities

Whether you're just starting in digital creation, want to add a twist to your visual thinking or looking to improve your digital expression, Wacom One delivers a great experience. It comes with all the essentials to spice up your digital life. There's the natural pen feel on the 13.3" screen, the included creative software – even the ability to connect to Android devices. And it's compatible with leading pen brands too. Open up new possibilities with Wacom One.

Paper-like canvas

With natural surface friction and minimal reflection, it feels like you're drawing or writing on paper, not glass.

Just like a standard pen

With no need for batteries, it's a pen that feels and looks just right in your hand. And, it's so accurate, what you do is what you see.

Space to play

See your imagination come to life in full color on a display that's nearly A4/letter in size.

Digital freedom

Sketch or paint directly onto screen, draw diagrams, annotate documents, enhance photos and videos, plus you can edit and update work, and share your creations with ease.

Bonus Pack included

Brilliant apps are waiting to be explored. The included Bamboo Paper* for example transforms your creative pen display into a sketchpad.
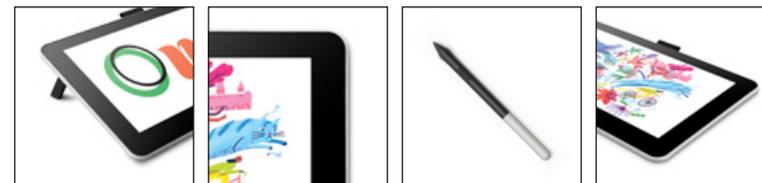

Connect your way

Wacom One isn't choosy when it comes to operating systems. So, you can link up to Mac or PC, and certain Android tablets or smartphones.
